SUMMARY

Passionate and results-driven Frontend Developer with a strong foundation in Computer Science, currently in my final year of BTech at Anand Engineering College. Proficient in crafting responsive, interactive, and user-friendly web applications using **HTML, CSS, JavaScript, and modern frontend frameworks**. Skilled in **data structures and algorithms**, ensuring optimized and efficient code. I thrive on creating intuitive and visually appealing interfaces. Eager to contribute my problem-solving skills and technical expertise to impactful projects in a collaborative environment.

PROJECTS

1. Encodex – Image Encryption & Decryption System

Project Summary:

Encodex is a **secure image encryption and decryption system** that enables users to encrypt images into unreadable formats and decrypt them back using a unique key. It ensures **high-level security** by generating a separate encryption key for each image, stored securely in a backend directory.

Key Highlights:

- Implements **AES-based Fernet encryption** for secure image processing.
- Generates a **unique encryption key** for each image to enhance security.
- Uses **Base64 encoding** to convert encrypted images into a readable format.
- Securely stores all keys inside a **protected backend directory**.
- Built a **user-friendly frontend** to simplify encryption/decryption.
- **Role:** Full-Stack Developer
- **Technologies Used:** Python, Flask, Fernet Encryption, Base64, HTML, CSS, JavaScript
- **GitHub Repository :** [Click Here](#)

2. Portfolio Website – Personal Developer Portfolio

Project Summary:

A fully responsive and **interactive personal portfolio website** showcasing my skills, projects, and achievements. The website includes **smooth animations**, a unique **theme toggle**, and a customized **effect** for a memorable first impression.

Key Highlights:

- Created a **dynamic website** with **animation effect**.
- Integrated **GSAP animations** for smooth page transitions.
- Implemented a **theme toggle button** with an expanding black background animation.
- **Role:** Frontend Developer
- **Technologies Used:** HTML, CSS, JavaScript, GSAP
- **GitHub Repository:** [Click Here](#)

3. Myntra Clone – E-commerce UI with Add to Bag Feature

Project Summary:

Developed a **basic yet functional clone of Myntra's e-commerce website**, focusing on UI design and interactive features. The key highlight of the project is the **"Add to Bag" functionality**, allowing users to add and remove items dynamically.

Key Highlights:

- Designed a **responsive and visually appealing UI** similar to Myntra.
- Implemented **"Add to Bag" functionality**, allowing users to **add and remove products** dynamically.
- Used **local storage** to persist the cart items even after page refresh.
- Built using **pure HTML, CSS, and JavaScript**, without any frameworks.
- **GitHub Repository:** [Click Here](#)
